Intro to FMEA

FMEA and Risk Management

DFMEA v. PFMEA

10 Step Process

Step 0 – Establish the ground rule

Step 1 – Define your System or Process to be analyzed

Step 2 – Identify the potential failure modes for product or process

Step 3 – Determine the potential effect(s) of the failure mode on the system or customer

Step 4 - Estimate the severity for each failure mode based on its effect

Step 5 - Determine the potential cause(s) for each failure mode

Step 6 - Estimate the likelihood of occurrence for each failure mode \u0026 cause

Step 7 - Determine the controls around that failure mode and root cause

Step 8 - Estimate your detection level for each failure mode, cause \u0026 effect

Step 9 - Calculate the Risk Priority Number (RPN) for each failure mode

Step 10 - Take Corrective Action to Reduce/Mitigate or eliminate risk
