Section 3 A Global Conflict Guided Answers Introduction

On War

On War is a treatise about a military art which Prussian officer Carl Philipp Gottlieb von Clausewitz had been working on for 15 years. It is commonly believed that Clausewitz's treatise had a greater impact on military leaders of the late XIX and XX centuries than any other book. In reality, this book is an overturn in the war theory. The work is notable for its brightness, narration details as well as hard criticism of many war events. The author dedicates a special place in his work to politics, its influence on the war events, the dependence how the war finishes on powers and weaknesses of particular politicians and military leaders. There is a good reason why his famous phrase "the war is the continuation of the politics, but with other, strong arm methods" is still relevant.

World Peace

This book investigates world peace: what it is, whether it might be achieved, and how.

Practitioners' Guide to Human Rights Law in Armed Conflict

Although the relationship between international human rights law and the law of armed conflict has been the subject of significant recent academic discussion, there remains a lack of comprehensive guidance in identifying the law applicable to specific situations faced by military forces. Providing guidance for armed forces and practitioners on the detailed application of international human rights law during armed conflict, this book fills that gap. Part 1 of the volume details foundational information relating to international human rights law and human rights institutions, the types of operations that States' armed forces engage in, and how the law of armed conflict and international human rights law apply to regulate different situations. Part 2 provides practical guidance as to the legal regulation of specific situations, including discussion of the conduct of hostilities, detention operations, humanitarian assistance, cyber operations, and investigations. This book is the result of an in-depth process involving both academic and practitioner experts in the law of armed conflict and international human rights law who were convened in meetings at Chatham House chaired by Elizabeth Wilmshurst, Distinguished Fellow at Chatham House. The group included Professor Françoise Hampson, Essex University; Professor Dapo Akande, Oxford University; Charles Garraway, Fellow at Essex University; Professor Noam Lubell, Essex University; Michael Meyer, British Red Cross; and Daragh Murray, Lecturer at Essex University.

Impact Evaluation in Practice, Second Edition

A magisterial, single-volume history of the greatest conflict the world has ever known by our foremost military historian. ***** The Second World War began in August 1939 on the edge of Manchuria and ended there exactly six years later with the Soviet invasion of northern China. The war in Europe appeared completely divorced from the war in the Pacific and China, and yet events on opposite sides of the world had profound effects. Using the most up-to-date scholarship and research, Beevor assembles the whole picture in a gripping narrative that extends from the North Atlantic to the South Pacific and from the snowbound steppe to the North African Desert. Although filling the broadest canvas on a heroic scale, Beevor's *The Second World War* never loses sight of the fate of the ordinary soldiers and civilians whose lives were crushed by the titanic forces unleashed in the most terrible war in history.

World History: Connections to Today

International humanitarian law is the law that governs the conduct of participants during armed conflict. This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not, or who no longer, take part in the hostilities. It is one of the oldest branches of international law and one of enduring relevance today. The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law. Written by a stellar line up of contributors, drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject, the text offers a comprehensive and authoritative exposition of the field. The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence. Each chapter illuminates how the law applies in practice, but does not shy away from the important conceptual issues that underpin how the law has developed. It will serve as a first port of call and a regular reference work for those interested in international humanitarian law.

World Literature (Teacher Guide)

This brief introduction surveys Christian thinking on an array of topics related to security and peace from a

just war perspective. Drawing primarily on Scripture and theology, Eric Patterson explores the moral dimensions of order, justice, and peace in light of key Christian doctrines such as love of neighbor, stewardship, vocation, and sphere sovereignty. He also examines the perennial questions of civil disobedience, terrorism, revolution, and holy war (including a discussion of Israel's removal of the Canaanites and the Crusades) and interacts with theological thinkers throughout Christian history. The volume concludes with a treatment of punishment and restitution, considering how these can help move a society toward conciliation. While ideal as a textbook for courses on Christian ethics, theology and politics, and church and society, this book will also appeal to pastors and lay readers questioning the morality of war and Christians' involvement in force. Christians who serve in government, law enforcement, and the military will also find helpful guidance for thinking theologically about their vocations.

NATIONAL BESTSELLER A New York Times Ten Best Books of the Year Finalist for the Lionel Gelber Prize Thoughtful and brilliant insights into the very nature of war--from the ancient Greeks to modern times--from world-renowned historian Margaret MacMillan. War, the instinct to fight, is inherent in human nature; peace is the aberration in history. War has shaped humanity, its institutions, its states, its values and ideas. Our very language, our public spaces, our private memories, some of our greatest cultural treasures reflect the glory and the misery of war. War is an uncomfortable and challenging subject not least because it brings out the most vile and the noblest aspects of humanity. Margaret MacMillan looks at the ways in which war has shaped human history and how, in turn, changes in political organization, technology, or ideologies have affected how and why we fight. The book considers such much-debated and controversial issues as when war first started; whether human nature dooms us to fight each other; why war has been described as the most

organized of all human activities and how it has forced us to become still more organized; how warriors are made and why are they almost always men; and how we try to control war. Drawing on lessons from a sweep of history and from all parts of the globe, MacMillan reveals the many faces of war--the way it shapes our past, our future, our views of the world, and our very conception of ourselves.
