TIP! Please use the gear icon ?? to the bottom right of your ...

1) Background paper: To determine the size of the background paper, lay box down on paper in the orientation of your choosing. Height of paper (Timestamp:) will be 1 box length + 2 box heights. Width of paper (Timestamp:) will be enough to wrap around box with a little overlap.

Initial pleats on underside of paper (Timestamp:) First fold a narrow pleat along the paper's edge. Then, fold an ODD number of folds. I chose to make 9, each about half the height of my index finger but you can make a few more or a few less to the size of your choosing as long as the total is an odd number. After the final fold, allow a little extra paper for a foldback but cut excess paper (Timestamp:).

Fan pleats on face of paper: First, identify the center column (Timestamp:) Starting with one side of the paper, fold down each center point to meet the center point directly below. You must NOT fold into the center column (Timestamp:)! Once you reach the center column, flip over paper over, cut out bottom portion of fan (Timestamp:), bind fan with tape (Timestamp:), and start the entire process over on the other side (Timestamp:).
