Adrian Frutiger – Typefaces

The Swiss type designer Adrian Frutiger decisively influenced the international creation of typefaces after 1950. His Univers typeface and the machine-readable font OCR-B are milestones, as is his type for the Paris airports, which evolved into the Frutiger typeface. All set new standards for signage types. In all, he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture.

The Printed Bengali Character and Its Evolution

This study traces the evolution of Indian typeforms, from the earliest attempts by European officials, missionaries and craftsmen both in India and in England in the late-18th century, through the eras of hot-metal typefounding and filmsetting, to the latest use of computer technology.

TEX and METAFONT

Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events.

Yearbook of International Organizations Online 2011-2012

Oxygen-deprived for two hours at birth, Christopher Nolan lived to write, at age twenty-one, the autobiography of his childhood, told as the story of Joseph Meehan. He wrote the book, using a \"unicorn stick\" attached to his head, letter by painful letter. The result is astonishingly lyrical, filled with powerful description, touching moments of triumph and humiliation, and, above all, disarming wit. It is, in the words of London's Daily Express, \"a book of sheer wonder\".

Under the Eye of the Clock

The international creation of typefaces after 1950 was decisively influenced by the Swiss type designer Adrian Frutiger. His Univers typeface and the machine-readable font OCR-B, which was adopted as an ISO standard, are milestones, as is his type for the Paris airports, which set new standards for signage types and evolved into the Frutiger typeface. With his corporate types, he helped to define the public profiles of companies such as the Japanese Shiseido line of cosmetics. In all he created some fifty types, including Ondine, Méridien, Avenir, and Vectora. Based on conversations with Frutiger himself and on extensive research in France, England, Germany, and Switzerland, this publication provides a highly detailed and accurate account of the type designer's artistic development. All of his types – from the design phase to the marketing stage – are illustrated and analyzed with reference to the technology and related types. Hitherto unpublished types that were never realized and more than one hundred logos complete the picture. This second, revised and expanded study edition, which now has an index, makes Frutiger's achievement even more accessible.

Dam Burst of Dreams is a collection of the unique writings of Christy Nolan, who has never been able to speak or totally control his movements. His remarkable talent was only released when he was introduced to a muscular relaxant drug which has given him sufficient control to compose, first with the aid of an electric typewriter and now with a processor, manipulated by a 'unicorn' stick attached to his head.

The Modern Dutch Poster

A reprint of Bailey's classic first published by Harper and Row in 1970. Contains a new preface (and now on alkaline paper). Annotation copyrighted by Book News, Inc., Portland, OR
