### **Simplicity Parenting**

Today's busier, faster society is waging an undeclared war on childhood. With too much stuff, too many choices, and too little time, children can become anxious, have trouble with friends and school, or even be diagnosed with behavioral problems. Now internationally renowned family consultant Kim John Payne helps parents reclaim for their children the space and freedom that all kids need for their attention to deepen and their individuality to flourish. Simplicity Parenting offers inspiration, ideas, and a blueprint for change: • Streamline your home environment. Reduce the amount of toys, books, and clutter—as well as the lights, sounds, and general sensory overload. • Establish rhythms and rituals. Discover ways to ease daily tensions, create battle-free mealtimes and bedtimes, and tell if your child is overwhelmed. • Schedule a break in the schedule. Establish intervals of calm and connection in your child's daily torrent of constant doing. • Scale back on media and parental involvement. Manage your children's "screen time" to limit the endless deluge of information and stimulation. A manifesto for protecting the grace of childhood, Simplicity Parenting is an eloquent guide to bringing new rhythms to bear on the lifelong art of raising children.

A groundbreaking book on the science of play, and its essential role in fuelling our intelligence and happiness throughout our lives. We've all seen the happiness in the face of a child who's playing in the school yard. Or the blissful abandon of a golden retriever racing with glee across a lawn. This is the joy of play. By definition, play is purposeless and all-consuming. And, most important, it's fun. As we become adults, taking time to play feels like a guilty pleasure — a distraction from 'real' work and life. But as Dr Stuart Brown illustrates, play is anything but trivial. It is a biological drive as integral to our health as sleep or nutrition, and the mechanism by which we become resilient, smart, and adaptable people. In fact, our ability to play throughout life is the single most important factor in determining our success and happiness. Dr Brown has spent his career studying animal behaviour and conducting more than 6000 'play histories' of humans from all walks of life — from serial murderers to Nobel Prize winners. In *Play*, he provides a sweeping look at the latest breakthroughs in our understanding of play and its implications for our lives, including its role in child development and the way we parent; education and social policy; business innovation; productivity; and even the future of our society. A fascinating blend of cutting-edge neuroscience, biology, psychology, social science, and inspiring human stories of the transformative power of play, this book proves why play just might be the most important work we can ever do.
