Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Affective Health and Masculinities in South Africa

As the twenty-first century dawns, public land policy is entering a new era. This timely book examines the historical, scientific, political, legal, and institutional developments that are changing management priorities

and policies—developments that compel us to view the public lands as an integrated ecological entity and a key biodiversity stronghold. Once the background is set, each chapter opens with a specific natural resource controversy, ranging from the Pacific Northwest's spotted owl imbroglio to the struggle over southern Utah's Colorado Plateau country. Robert Keiter uses these case histories to analyze the ideas, forces, and institutions that are both fomenting and retarding change. Although Congress has the final say in how the public domain is managed, the public land agencies, federal courts, and western communities are each playing important roles in the transformation to an ecological management regime. At the same time, a newly emergent and homegrown collaborative process movement has given the public land constituencies a greater role in administering these lands. Arguing that we must integrate the new imperatives of ecosystem science with our devolutionary political tendencies, Keiter outlines a coherent new approach to natural resources policy.

"SISTERS OF TREASON, the second novel by Elizabeth Fremantle, is a story of love, politics and tragedy. Beginning early in Mary Tudor's turbulent reign, SISTERS OF TREASON explores the lives of a pair of sisters as dangerously close to the throne as their sister Lady Jane Grey, who died on the executioner's block at the age of 16, after being queen for nine days. After Jane's death, Lady Catherine becomes the focus of plots to thwart Mary Stuart's claim on England's throne. Catherine is a young woman driven by a compulsive and ultimately fatal desire to love and be loved. Clever Lady Mary is burdened with a crooked spine and a tiny stature in an age when physical perfection equates to goodness and vice versa. Both girls have inherited the Tudor blood that is more curse than blessing. It is court painter Levina Teerlinc who helps the girls survive Mary's reign, but when the Queen's sister, the hot-headed Elizabeth, inherits the crown, the world at court becomes increasingly treacherous for the Grey girls. For either girl to marry without the queen's permission would be a potentially fatal political act, perceived as a treasonous grab for the throne, but Elizabeth is unlikely to let either girl ally herself and become an even more dangerous focus for her enemies. Each young woman must decide how far she will go to defy her queen and find the safety and love she longs for"--

Winner of the Enlightened Economist Prize 2019 *Winner of Debut Writer of the Year at the Edward Stanford Travel Writing Awards 2020* *Longlisted for the Financial Times & McKinsey Business Book of the Year Award 2019* 'Extreme Economies is a revelation - and a must-read.' Andy Haldane, Chief Economist at the Bank of England To understand how humans react and adapt to economic change we need to study people who live in harsh environments. From death-row prisoners trading in institutions where money is banned to flourishing entrepreneurs in the world's largest refugee camp, from the unrealised potential of cities like Kinshasa to the hyper-modern economy of Estonia, every life in this book has been hit by a seismic shock, violently broken or changed in some way. In his quest for a purer view of how economies succeed and fail, Richard Davies takes the reader off the beaten path to places where part of the economy has been repressed, removed, destroyed or turbocharged. He tells the personal stories of humans living in these extreme situations, and of the financial infrastructure they create. Far from the familiar stock reports, housing crises, or banking scandals of the financial pages, Extreme Economies reveals the importance of human and social capital, and in so doing tells small stories that shed light on today's biggest economic questions. 'A highly original approach to understanding what really makes economies tick.' Mervyn King, former Governor of the Bank of England

Return to the summer of '73 and adventure through Alaska as a Smokejumper. In an odyssey of movement and beauty we move back and forth across Alaska, jumping fires from Kodiak Island to the shadows of Denali, and in the winds of Isabel Pass. The smokejumpers themselves are a varied lot - several are ex-Air America bad boys recently back from covert CIA operations in Southeast Asia, and in no mood to take orders from anyone. The rest of the crew is made up of transfers and no-rehires from the jump bases in the Lower 48 where strict, top-down, authoritarian management made it hard, if not impossible, for them to fit in. Being stuck on Fort Wainwright in a dark and dreary hangar, surrounded by chain link fences and gravel lots, and under the eye of the Army Military Police is a recipe for disaster with a healthy serving of rebellion, heroism, pranks and humor thrown in. Adventure with these smokejumpers as they ultimately come together in an outrageous testimony to the joy of living life fully and playfully in one of America's last great true-life adventures.
