Environmental harm is commonly associated with companies that extract, consume, and pollute our shared natural resources. Rarely are the 'unseen polluters,' the financiers that sponsor and profit from eco-damaging corporations, placed at the forefront of the environmental debate. By focusing on these unseen polluters, Benjamin Richardson provides a comprehensive examination of socially responsible investment (SRI), and offers a guide to possible reform. Richardson proposes that greater regulatory supervision of SRI will help ensure that the financial sector prioritizes ethically-based investments. In *Socially Responsible Investment Law*, he suggests that new governmental reforms should encourage companies to participate in socially responsible investments by providing a better mix of standards and incentives for SRI through measures that include redefining the fiduciary responsibilities of institutional investors to incorporate environmental concerns. By doing so, Richardson posits that corporate financiers, including banks, hedge funds, and pension plans, will become more accountable to the goals of ensuring sustainable development.

Energy Investing that gets beyond the hype 2001 was perhaps the most tumultuous year in the modern history of the energy industry. As with telecommunications, computer and information technology, and Internet/e-commerce businesses over the last two decades, it is now a truly delicate but potentially lucrative time to invest in electricity. Deregulation means that investors face a breathtaking array of new companies

and technologies that have the potential to grow and accumulate wealth. With a focus on understanding market dynamics and "technology capital," Jason Makansi shows you how to get beyond analyst hype, uncover new opportunities, and invest wisely in *An Investor's Guide to the Electricity Economy*. Divided into three sections—"The Industry," "The Investor," and "Case Studies"—this book introduces readers to the most current and relevant industry trends, critical insights and research based on the author's tested methodology, and the companies and technologies that are transforming the industry. The author's "Technology Matrix" assesses the potential of new companies based on technology development cycles, market-entry timing, commercialization progress, and strategic alliances. Understanding the new energy wholesale and retail experience, in which business and consumers will have a variety of providers and service plans to choose from, is emphasized throughout. Other topics covered include: * Neglected investment opportunities such as in the coal, nuclear, energy storage, and transmission sectors * Energy information services and distributed power * The California electricity crisis of 2000--2001—lessons learned * Corporate profiles of industry innovators Institutional and individual investors, analysts, policy-makers, researchers, and industry executives will find *An Investor's Guide to the Electricity Economy* a lively and indispensable read.

Speaking all over the United States about apologetics issues, Charlie Campbell has heard just about every question skeptics have to offer. In this concise, reader-friendly handbook, he provides brief responses to the top-40 questions that keep people from the faith, such as... What evidence do you have that God exists? How do you know the Bible is actually true? What about those who have never heard of Jesus? Will they be condemned to hell? If God is so loving, why does He allow evil and suffering? How can you say Jesus is the only way to heaven? Don't all religions basically teach the same thing? Aren't a lot of churchgoers hypocrites? With a gracious introductory note to skeptical readers and a generous sprinkling of inspiring quotes throughout, this handy resource is an enjoyable read as well as a powerful evangelistic tool.

The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.

Molecular Associations in Biology provides information pertinent to molecular biology. This book discusses several topics, including DNA replication, calculation of intermolecular energies, and thermodynamic parameters of polynucleotides. Organized into 35 chapters, this book starts with an overview of the specific

association of the purine and pyrimidine bases in the nucleic acids, which provides the basis for storage, expression, and transmission of genetic information. This text then explores the secondary structures, interactions, and replication processes of nucleic acids. Other chapters consider the complex biological process of protein synthesis. This book discusses as well the methods of photodynamic action, which is significant in detecting energy transfer from dye to the biomolecule and identifying the free radicals produced. The final chapter deals with the macroscopic properties of molecular systems, which refer to such concepts as volume, mass, pressure, temperature, and pH. This book is a valuable resource for biophysicists, organic chemists, biochemists, and biologists.

This book chronicles artist Sanford Wurmfeld's now legendary color class, which he seeded, developed, and taught at Hunter College in New York City for more than two decades. The "Color Seminar" was geared to both artists and art historians alike, and Wurmfeld taught it each semester for twenty-five years, with his last class taking place in the spring of 2012, the year he retired. All told, more than 500 individuals participated in his elective course, and its extensive and continuing impact on contemporary art discourse, and on abstract painting in particular, cannot be overstated. From studios to classrooms, former students, now established artists in their own right, have been teaching their own interpretations of this course for years now in visual arts and curatorial programs across the country. Wurmfeld's new book begins with a discussion of afterimages and related experiments concerning the nature of color experience. It then works its way through theoretical ideas about color and the phenomenology of perception, finally ending with a discussion of color as content in 20th and 21st century abstraction -- what Wurmfeld terms presentational art -- with its emphasis on artists crafting the viewer experience through an active analysis of color. The book concludes with an

exhaustive bibliography of additional resources for readers to continue their own self-directed research into color history and experience.

The title is an effective, manualized parent education programme' - Educational Book Review This groundbreaking training programme has been developed in response to a real need for evidence-based early interventions for very young autistic children. Authoritative and extensively tried and tested, it will help both parents and carers to understand the disorder and how it affects child development. Ultimately, the programme is designed to reduce the severity of emotional/behavioural difficulties by managing a child's particular problems and encouraging effective collaboration between professionals and parents. The programme is delivered through two accessible manuals - one for parents and one for clinicians - which provide all the information and materials you need. The Manual for Clinicians explains the purpose and content of each session and includes notes for discussion and teaching, a checklist of 'things to do', and photocopiable task sheets for distribution and discussion. The Manual for Parents features tasks, exercises and discussion points for group sessions, and complements these training materials with engaging personal accounts, an introduction to the history of autism, information about approaches to treatment, and a list of useful websites and further reading. Structured as a series of individual and small group sessions, the programme is designed to run for 20 weeks and covers key areas such as understanding and managing difficult behaviour; changing/encouraging new behaviours; communication problems in verbal and non-verbal children; social problems; and how to work and play together. Together, these manuals will provide you with all the information, support and resources you need to run this programme successfully.

A House in Corfu is the story of one of the most beautiful places on earth, still astonishingly unspoilt, on the west coast of Corfu. In the early 1960s, Emma Tennant's parents, on a cruise, spotted a magical bay and decided to build a house there. This book is the story of that house, Rovinia, set in 42 hectares of land above the bay where legend has it Ulysses was shipwrecked and found by Nausicaa, daughter of King Alcinous. It is also the story of the people who have been at Rovinia since the feast in the grove at the time of putting on the roof - Maria, a miraculous cook and the presiding spirit of the house, and her husband Thodoros - and of the inhabitants of the local village, high on the hill above the bay. Full of colour and contrast, A House in Corfu shows the huge changes in island life since the time of the building of the house, and celebrates, equally, the joy of belonging to a timeless world; the world of vine, olive and sea.

The symptoms associated with menopause can begin fifteen years prior to the onset of menopause. During that early stage, called perimenopause, many women experience bewildering symptoms such as hot flashes, mood swings, irregular menstrual cycles, sleeping disorders, and what some describe as "PMS all month." Perimenopause has often been ignored in the past, and even the medical community is just becoming aware of its widespread presence in pre-menopausal women. Given that fact, it is wise to learn as much as possible about this process. In a jargon-free, reader-friendly style, "Perimenopause--Preparing for the Change" discusses: - What perimenopause is, when it occurs, how to diagnose it, and what it means - Symptoms and solutions and natural versus medicated treatments - Wellness: stress relief, weight control, exercise, diet, and nutrition - Finding the right doctor and what to expect during an office visit - Fertility and infertility - Psychology, sexuality and perimenopause - Talking with other women: support groups and how to tell if you need them - The pros and cons of hormone replacement therapy (HRT) In order to be proactive in your health care you need to educate yourself. Menopause may have once changed women. But, when informed, women can change menopause. About the Authors Nancy Teaff, M.D., is a Fellow of the American College of Obstetrics and Gynecology. As a female infertility specialist, she saw a need for more information on menopause. Kim Wright Wiley is the best-selling author of "Walt Disney World with Kids. She is a contributing editor to Working Mother magazine and writes regularly for "Family Fun, "Parents and "Parenting magazines.
