Author: David Meyer, MD Date: ...

start by putting the phoropter in front of the patient

start with the right eye

start out by making his vision very blurry in the right eye

begin refining your refraction

get a good ballpark of the spherical component

turn the dial in the direction of the white dot

match up at axis 55

maintain a spherical equivalent of the prescription

refined the axis of the cylinder

fitting the patient with a monthly lens

look at the edge of the contact lens

put the contact lens on the edge of my finger

place it on close to the lower limbus of his cornea

place the contact lens on the patient

pull down on the lower lid

rotating about ten degrees
