How to Grow Bacteria - How to Grow Bacteria by DIY bama 4,224,143 views 5 years ago 2 minutes, 57 seconds - About This Video: In this video Sean Cannell from Video Influencers covers How to Make Money on YouTube with Affiliate ...

The materials we need

Pour 10g of agar into 330ml of water

Stir the solution until it is completely dissolved

Put the solution into the microwave

Take the solution out and let it cool down for 3 minutes

Pour the solution on the petri dishes and close the lids

After one hour, the solution will solidify

Use a cotton swab to collect the bacteria sample

E.g. you can rub the cotton swab on the door handle

Draw a squiggly line in the agar softly and close the lid

Use a few more clean cotton swabs to collect more samples

Put the petri dishes into a closed box for a week

Here is the result!

Let's have a closer look!

We can also put the hand on the petri dish

Is it funny?

Grow bacteria and germs at home! - Grow bacteria and germs at home! by SACNAS at UTSW 1,293 views 3 years ago 2 minutes, 47 seconds - Scientists grow **bacteria**, to study the principles of genetics and biochemistry. Do you know how we grow **bacteria**, in the ...

Award-Winning Footage Of The Microscopic World Around Us - Award-Winning Footage Of The Microscopic World Around Us by Insider Science 18,475,403 views 5 years ago 3 minutes, 20 seconds - This year's Nikon Small World Motion Photomicrography Competition has given us a fascinating glimpse into the

realm of the ...

Just beyond the limits of human sight...

Is an unseen universe that only microscopes can explore.

These are the gears of a pocket watch ticking away time.

Some of this footage is helping researchers crack nature's mysteries.

Like this video filmed over 16 hours...

It reveals how a baby zebrafish's nervous system develops.

In second place were these electrifying green.

They're actually a laser beam shooting through soap bubbles...

Bending and refracting into a dazzling display of light.

And in third place was this marine worm.

No, it's not playing an instrument...

It's just trying to swallow something.

In fourth place is this footage of an expectant mother.

She's a tiny Daphnia water flea...

And is having twins!

But these award winners are just the tip of the iceberg.

If you're a baby stinkbug, then it's an egg hatching under a leaf.

What about these growing golden crystals?

Just a bit of soy sauce that's drying up.

The salts begin to crystallize as the water evaporates away.

Microstomum lineare: an aquatic worm that likes to wriggle.

These fat cells of a mouse are dividing and multiplying.

This creature is magnified about four to six times.

Inside each of our cells is a dynamic network of structural tubes.

And our bodies are constantly fighting off enemies...

The microscopic world around us is mesmerizing to watch.

HOW TO BREED LAB - LACTOBACILLUS BACTERIA - HOW TO BREED LAB - LACTOBACILLUS BACTERIA by The Weedy Garden 179,426 views 3 years ago 21 minutes - In this video I'll show you a few good things to know if you make soil **bacteria**, for your garden. This is a follow up from this video: ...
