Epistemologies of the South

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Improving Measurement of Productivity in Higher Education

Higher education is a linchpin of the American economy and society: teaching and research at colleges and universities contribute significantly to the nation's economic activity, both directly and through their impact on future growth; federal and state governments support teaching and research with billions of taxpayers' dollars; and individuals, communities, and the nation gain from the learning and innovation that occur in higher education. In the current environment of increasing tuition and shrinking public funds, a sense of urgency has emerged to better track the performance of colleges and universities in the hope that their costs can be contained without compromising quality or accessibility. Improving Measurement of Productivity in Higher Education presents an analytically well-defined concept of productivity in higher education and recommends empirically valid and operationally practical guidelines for measuring it. In addition to its obvious policy and research value, improved measures of productivity may generate insights that potentially lead to enhanced departmental, institutional, or system educational processes. Improving Measurement of Productivity in Higher Education constructs valid productivity measures to supplement the body of information used to guide resource allocation decisions at the system, state, and national levels and to assist policymakers who must assess investments in higher education against other compelling demands on scarce resources. By portraying the productive process in detail, this report will allow stakeholders to better understand the complexities of-and potential approaches to-measuring institution, system and national-level performance in higher education.

2016 8th International Conference on Cyber Conflict (CyCon)

In today's increasingly complex cyberspace we see a variety of actors struggling to gain or maintain their position. The ubiquitous use of information and communication technologies has had a profound influence on how these actors pursue their goals and interests. The 8th International Conference on Cyber Conflict (CyCon 2016) will focus on cyber power as one of the core elements of relations between different stakeholders and will discuss how the traditional concept of power applies to cyberspace. Both hard and soft power are being employed to achieve strategic and political goals through technical, legal and economic means. But how can we assess such power? How can we ensure that such power remains in the right hands? How can we ensure or enforce cyber power without risking conflict escalation? How can we respond to exercises of this power with the right tools and measures? Is there a way to maintain a balance of power in cyberspace?

Emphasising a patient centred approach, this book practically applies knowledge from research to inform patient assessment and management. It also provides practical information and illustrations to assist clinicians to develop treatment programs with and for their patients with neck pain. Current issues and debates in the field of neck pain disorders. Research informing best practice assessment and management. Biological, psychological and social features which need to be considered when assessing and developing a management program with the patient. A multimodal conservative management approach, which addresses the presenting episode of pain as well as rehabilitation strategies towards prevention of recurrent episodes.

Conflicts over Natural Resources in the Global South

Inhabitants of poor, rural areas in the Global South heavily depend on natural resources in their immediate vicinity. Conflicts over and exploitation of these resources – whether it is water, fish, wood fuel, minerals, or

land – severely affect their livelihoods. The contributors to this volume leave behind the polarised debate, previously surrounding the relationship between natural resources and conflict, preferring a more nuanced approach that allows for multiple causes at various levels. The contributions cover a wide array of resources, geographical contexts (Africa, Asia and Latin America), and conflict dynamics. Most are of a comparative nature, exploring experiences of conflict as well as cooperation in multiple regions. This volume finds its origin in an innovative research programme with the acronym CoCooN, steered by The Netherlands Organisation for Scientific Research (NWO/WOTRO) and involving universities and civil society partners in many countries. It presents the conceptual approaches adhered to by each of seven interdisciplinary projects, ranging from green criminology and political ecology to institutional analysis, legal pluralism and identity politics. The volume will be of interest to academics and practitioners concerned with an understanding of conflict as well as cooperation over natural resources.

Mission Command in the 21st Century

"Political Warfare provides a well-researched and wide-ranging overview of the nature of the People's Republic of China (PRC) threat and the political warfare strategies, doctrines, and operational practices used by the Chinese Communist Party (CCP). The author offers detailed and illuminating case studies of PRC political warfare operations designed to undermine Thailand, a U.S. treaty ally, and Taiwan, a close friend"--

How do the benefits of higher education compare with its costs, and how does this comparison vary across individuals and institutions? These questions are fundamental to quantifying the productivity of the education sector. The studies in *Productivity in Higher Education* use rich and novel administrative data, modern econometric methods, and careful institutional analysis to explore productivity issues. The authors examine the returns to undergraduate education, differences in costs by major, the productivity of for-profit schools, the productivity of various types of faculty and of outcomes, the effects of online education on the higher education market, and the ways in which the productivity of different institutions responds to market forces. The analyses recognize five key challenges to assessing productivity in higher education: the potential for multiple student outcomes in terms of skills, earnings, invention, and employment; the fact that colleges and universities are "multiproduct" firms that conduct varied activities across many domains; the fact that students select which school to attend based in part on their aptitude; the difficulty of attributing outcomes to individual institutions when students attend more than one; and the possibility that some of the benefits of higher education may arise from the system as a whole rather than from a single institution. The findings and the approaches illustrated can facilitate decision-making processes in higher education.

Political Warfare

This book is a critical assessment of functional democratic government, especially of the irrational and often self-serving social perceptions that influence individual behavior and prevent optimal societal cohesion. The detailed descriptions of the cognitive limitations people face in comprehending their sociopolitical and cultural environments, leading them to apply an evolving catalogue of general stereotypes to a complex reality, rendered *Public Opinion* a seminal text in the fields of media studies, political science, and social psychology.

Productivity in Higher Education

The pacy, sensitive and formidably argued history of the causes of the First World War, from acclaimed historian and author Christopher Clark *SUNDAY TIMES* and *INDEPENDENT BOOKS OF THE YEAR* 2012 The moments that it took Gavrilo Princip to step forward to the stalled car and shoot dead Franz Ferdinand and his wife were perhaps the most fateful of the modern era. An act of terrorism of staggering efficiency, it fulfilled its every aim: it would liberate Bosnia from Habsburg rule and it created a powerful

new Serbia, but it also brought down four great empires, killed millions of men and destroyed a civilization. What made a seemingly prosperous and complacent Europe so vulnerable to the impact of this assassination? In *The Sleepwalkers* Christopher Clark retells the story of the outbreak of the First World War and its causes. Above all, it shows how the failure to understand the seriousness of the chaotic, near genocidal fighting in the Balkans would drag Europe into catastrophe. Reviews: 'Formidable ... one of the most impressive and stimulating studies of the period ever published' Max Hastings, *Sunday Times* 'Easily the best book ever written on the subject ... A work of rare beauty that combines meticulous research with sensitive analysis and elegant prose. The enormous weight of its quality inspires amazement and awe ... Academics should take note: Good history can still be a good story' *Washington Post* 'A lovingly researched work of the highest scholarship. It is hard to believe we will ever see a better narrative of what was perhaps the biggest collective blunder in the history of international relations' Niall Ferguson '[Reading *The Sleepwalkers*], it is as if a light had been turned on a half-darkened stage of shadowy characters cursing among themselves without reason ... [Clark] demolishes the standard view ... The brilliance of Clark's far-reaching history is that we are able to discern how the past was genuinely prologue ... In conception, steely scholarship and piercing insights, his book is a masterpiece' Harold Evans, *New York Times Book Review* 'Impeccably researched, provocatively argued and elegantly written ... a model of scholarship' *Sunday Times Books of the Year* 'Superb ... effectively consigns the old historical consensus to the bin ... It's not often that one has the privilege of reading a book that reforges our understanding of one of the seminal events of world history' *Mail Online* 'A monumental new volume ... Revelatory, even revolutionary ... Clark has done a masterful job explaining the inexplicable' *Boston Globe* 'Superb ... One of the great mysteries of history is how Europe's great powers could have stumbled into World War I ... This is the single best book I have read on this important topic' Fareed Zakaria 'A meticulously researched, superbly organized, and handsomely written account *Military History* Clark is a masterly historian ... His account vividly reconstructs key decision points while deftly sketching the context driving them ... A magisterial work' *Wall Street Journal* About the author: Christopher Clark is Professor of Modern History at the University of Cambridge and a Fellow of St Catharine's College. He is the author of *The Politics of Conversion*, *Kaiser Wilhelm II and Iron Kingdom*. Widely praised around the world, *Iron Kingdom* became a major bestseller. He has been awarded the Officer's Cross of the Order of Merit of the Federal Republic of Germany.

Public Opinion

For the US Army to succeed in the 21st Century, Soldiers of all ranks must understand and use Mission Command. Mission Command empowers leaders at all levels, allowing them to synchronize all warfighting functions and information systems to seize, retain, and exploit the initiative against a range of adversaries. This collection of historical vignettes seeks to sharpen our understanding of Mission Command philosophy and practice by providing examples from the past in which Mission Command principles played a decisive role. Some vignettes show junior officers following their commander's intent and exercising disciplined initiative in very chaotic combat operations. Others recount how field grade officers built cohesive teams that relied on mutual trust to achieve key operational objectives. Each historical account is complemented by an annotated explanation of how the six Mission Command principles shaped the action. For this reason, the collection is ideal for leader development in the Army school system as well as for unit and individual professional development. Mission Command places great responsibility on our Soldiers.

The Sleepwalkers

This new edition of David Forsythe's successful textbook provides an authoritative overview of the place of human rights in international politics in an age of terrorism. The book focuses on four central themes: the resilience of human rights norms, the importance of 'soft' law, the key role of non-governmental organizations, and the changing nature of state sovereignty. Human rights standards are examined according to global, regional, and national levels of analysis with a separate chapter dedicated to transnational corporations. This second edition has been updated to reflect recent events, notably the creation of the ICC and events in Iraq and Guantanamo Bay, and new sections have been added on subjects such as the

correlation between world conditions and the fate of universal human rights. Containing chapter-by-chapter guides to further reading and discussion questions, this book will be of interest to undergraduate and graduate students of human rights, and their teachers. David Forsythe received the Distinguished Scholar Award for 2007 from the Human Rights Section of the American Political Science Association.

Textbook of Respiratory Medicine

U.S. Army company leaders have long been recognized as overworked. This report is intended to help the Army identify ways to reduce and manage the time burdens on Active Component company leaders in garrison by examining these leaders' time burdens.

Human Rights in International Relations

The platoon leader and platoon sergeant are two of the most important leaders in the U.S. Army. The way platoon leaders and sergeants work together as a team can cause the success or failure of companies, battalions, brigades, and divisions. They represent the leading edge of leadership on and off the battlefield. On the battlefield, platoon leaders and sergeants build their platoons, empower squad leaders, integrate outside elements, and use troop-leading procedures to plan and lead. Off the battlefield, platoon leaders and sergeants prepare their platoon for combat through tough training. The platoon leader and platoon sergeant's ability to coach, teach, and mentor their Soldiers leads directly to the readiness of our formations. World-wide, platoon leaders and sergeants are personally leading the U.S. Army at the lowest level. This handbook is a guide for new leaders to help prepare them for a critical crucible of leadership that will determine the U.S. Army's ability to fight and win our country's wars.

The Technology of Study

"Understanding policing, a resource for human rights activists gives background information on policing issues for human rights advocates working on policing and those considering embarking on such work. This resource book is based on the premise that in order to intervene effectively in police conduct, it is essential to have a thorough understanding of policing and the context in which it takes place: both the legal standards guiding police work as well as the practical methodologies developed by police to implement these. Armed with this understanding human rights advocates can make an assessment of police agencies in specific contexts. Such an assessment is vital both to developing an effective research and campaigning strategy for the improvement of police compliance with human rights, and to deciding whom to target whether to follow a confrontational and/or engagement approach."--p. 4 of cover.

Waddle On!

This book examines the recent popularity of the dystopian genre in literature and film, as well as connecting contemporary manifestations of dystopia to cultural trends and the implications of technological and social changes on the individual and society as a whole. Dystopia, as a genre, reflects our greatest fears of what the future might bring, based on analysis of the present. This book connects traditional dystopian works with their contexts and compares these with contemporary versions. It centers around two main questions: Why is dystopia so popular now? And, why is dystopia so popular with young adult audiences? Since dystopia reflects the fears of society as a whole, this book will have broad appeal for any reader, and will be particularly useful to teachers in a variety of settings, such as in a high school or college-level classroom to

teach dystopian literature, or in a comparative literature classroom to show how the genre has appeared in multiple locales at different times. Indeed, the book's interdisciplinary nature allows it to be of use in classes focussing on politics, bioethics, privacy issues, women's studies, and any number of additional topics.

Reducing the Time Burdens of Army Company Leaders

Eminently suited to classroom use as well as individual study, Roger Myerson's introductory text provides a clear and thorough examination of the models, solution concepts, results, and methodological principles of noncooperative and cooperative game theory. Myerson introduces, clarifies, and synthesizes the extraordinary advances made in the subject over the past fifteen years, presents an overview of decision theory, and comprehensively reviews the development of the fundamental models: games in extensive form and strategic form, and Bayesian games with incomplete information.

Understanding Policing

In this highly original work, Mary Njeri Kinyanjui explores the trajectory of women's movement from the margins of urbanization into the centres of business activities in Nairobi and its accompanying implications for urban planning. While women in much of Africa have struggled to gain urban citizenship and continue to be weighed down by poor education, low income and confinement to domestic responsibilities due to patriarchic norms, a new form of urban dynamism - partly informed by the informal economy - is now enabling them to manage poverty, create jobs and link to the circuits of capital and labour. Relying on social ties, reciprocity, sharing and collaboration, women's informal 'solidarity entrepreneurialism' is taking them away from the margins of business activity and catapulting them into the centre. Bringing together key issues of gender, economic informality and urban planning in Africa, Kinyanjui demonstrates that women have become a critical factor in the making of a postcolonial city.

The Age of Dystopia

Europe is a popular destination for LGBTQ people seeking to escape discrimination and persecution. Yet, while European institutions have done much to promote the legal equality of sexual minorities and a number of states pride themselves on their acceptance of sexual diversity, the image of European tolerance and the reality faced by LGBTQ migrants and asylum seekers are often quite different. To engage with these conflicting discourses, *Queer Migration and Asylum in Europe* brings together scholars from politics,

sociology, urban studies, anthropology and law to analyse how and why queer individuals migrate to or seek asylum in Europe, as well as the legal, social and political frameworks they are forced to navigate to feel at home or to regularise their status in the destination societies. The subjects covered include LGBTQ Latino migrants' relationship with queer and diasporic spaces in London; diasporic consciousness of queer Polish, Russian and Brazilian migrants in Berlin; the role of the Council of Europe in shaping legal and policy frameworks relating to queer migration and asylum; the challenges facing bisexual asylum seekers; queer asylum and homonationalism in the Netherlands; and the role of space, faith and LGBTQ organisations in Germany, Italy, the UK and France in supporting queer asylum seekers.

A Treatise on the Family

On Cyber is a groundbreaking work that fuses information security and military science to lay the foundation of an operational art for cyberspace operations. Hundreds of books have been written on the tactics of cybersecurity and dozens have been written that discuss the strategic implications of cyber conflict. But missing is a book that links the two. On Cyber fills that gap. After millennia of conflict, traditional kinetic war fighting is highly refined and captured in mature and vetted military doctrine. Cyber operations, however is constantly evolving and affords tremendous benefits alongside significant challenges. Nations around the world have raced to build cyber organizations and capabilities, but are struggling to employ cyber operations to their benefit. Some have stumbled, while others have had dramatic impact on the battlefield and global geopolitics. At the same time, companies and even individuals are now facing nation state and nation state enabled threat actors in cyberspace while their governments remain apparently powerless to protect them. Whether you are a network defender or cyber operator, On Cyber is a seminal book and the lessons you learn will help you do your job better. Importantly, network defenders will understand how nation-state threat actors think, organize, operate, and target your organization. Cyber operators will gain a glimpse into the future of cyber doctrine. The authors are perhaps the best two people to author such an ambitious work, having served on the faculty of West Point for a combined 20 years, participated in military cyber operations and training, helped architect the U.S. Army's Cyber Branch, and together possess more than 50 years of military experience.

Game Theory

Despite its crucial importance, scientists interested in the limitations of human physical performance have only just started to give the field of oxygen uptake kinetics the attention it deserves. Understanding the principal determinant of the oxygen uptake kinetics is fundamental to improving human performance or the quality of life. This book provides a detailed overview of the current state of knowledge of this emerging field of study, and features: * an introduction to oxygen uptake kinetics and historical development of the discipline * measurement and analysis of oxygen uptake kinetics * control of and limitations to oxygen uptake kinetics * applications of oxygen uptake kinetics in a range of human populations. Oxygen Uptake Kinetics in Sport, Health and Medicine is richly illustrated and structured to enable easy access of information and represents an invaluable resource for students and researchers in exercise physiology, as well as for respiratory physiologists and pulmonary clinicians.

~These Strongest Shall Survive

From the foreword: \"The present volume, Vanguard of Valor II, offers six accounts of US Soldiers at the tip of the spear during the Afghan campaign. The Combat Studies Institute's Vanguard of Valor series is intended to document small unit actions in Afghanistan. These books play an equally important role by offering insights to Soldiers who may find themselves in the years ahead under similar conditions, whether in Afghanistan or in some other troubled land where they have been deployed to conduct the dangerous business of defending the national interest in a theater of war.\"

Women and the Informal Economy in Urban Africa

This publication contains the text of the code adopted by the Committee of Ministers of the Council of Europe in September 2001, together with an explanatory memorandum. It details the basic principles which should apply to police services in democratic societies governed by the rule of law. It is intended to provide guidance for governments of Council of Europe member states on the general organisational framework of the police service, their role in the criminal justice system and other issues including accountability. Some parts of the text are intended to serve as model provisions for national legislation and codes of conduct as well as principles for ethical policing.

Queer Migration and Asylum in Europe

From the foreword by Genral (ret.) David Petraeus: "In 2010, as the scale and tempo of Coalition operations in Afghanistan increased, so did the need for historical accounts of small-unit actions. As commander of the International Security Assistance Force (ISAF), I commissioned the Combat Studies Institute to research and write the cases collected in this volume and in those that will follow. By capturing key insights from both lethal and non-lethal operations, I hoped these accounts would be of immediate utility to sergeants and lieutenants at the center of future operations. The eight actions described in these pages take the reader through a wide range of platoon-level operations, from an intense firefight near Kandahar to an intricate civic action project in Kunar Province. Drawing from dozens of Soldier interviews, these accounts vividly depict the actions themselves and offer critical insights of greatest benefit to the small-unit actions leaders of today and tomorrow. The US Army always has prided itself as an institution of constant learning, strongly committed to drawing lessons from its past. This volume from the Combat Studies Institute is an excellent example of that long and honorable tradition. I hope that you will find the actions in Vanguard of Valor to be both instructive and compelling. I am sure that you will find them to be inspirational."

Oxygen Uptake Kinetics in Sport, Exercise and Medicine

Synopsis: Many people are interested in mathematics, but do not have any particular skill in its techniques. "Mathematics To Do - a recreational mathematics book" was written for a group of such people whose only skill was the ability to use a calculator. The topics covered can enrich the knowledge of anyone from the age of about 15 years to 85, mathematician or not, so long as they have an enquiring mind. As the title of the book suggests, you will learn by doing, not just by reading. See www.mathematics2do.com for a summary of the book's contents, and an idea of its style.----About the Author: Chris O'Donoghue, author of "Mathematics To Do," was a school teacher, specialising in mathematics. When he retired, free from the constraints of syllabuses, he explored many interesting topics which he presented to a group of students over the course of a year. He does not regard himself as a particularly gifted mathematician, and so understands how the subject needs to be kept simple.----
